

Wide range and high quality products from the first hand, the opportunity to sign mutually beneficial deals with manufacturers directly are hallmarks of the International industrial fair and Cooperation exchange (IIFCE). This traditional forum of manufacturers, which is held this year for the ninth time, has united more than 2 thousand enterprises, companies and organizations of Uzbekistan, representing more than 21 thousand kinds of products.

In particular, the enterprises within the structure of the Association Uzeltekhsanoat have demonstrated extensive expositions in the pavilions of Uzexpocenter. The most recognizable among them – JSC "Sino", SUE "Photon", the group of companies under the brand "Artel" and others. Their stands attracted many visitors and participants. This is not surprising, since the enterprises of the electrotechnical industry in recent years has mastered the production of complex household and radio products – modern models of TVs, household and industrial refrigerators, air conditioners, gas cookers, vacuum cleaners, energy saving lamps, electric kettles, irons and mobile phones.

As in previous years, stands of large industrial giants of our country, in particular, Almalyk mining and metallurgical plant (AMMP) hit the scale. AMMP within the Program of localization of production is implementing 27 projects worth 67 billion soums this year
(currency rates of CB RU from 05.11.2015

1\$= 2692.13 soums)

. They provide for the production of equipment for the mining industry and its spare parts, for example, GRAT pumps, mine trolley, ball mills, hydrocyclones, as well as the manufacture of non-ferrous products with deep processing of local raw materials and production of goods with high added value, such as copper pipes, zinc sulfate, faucets for sanitary ware, valves and manifolds.

The open area of "Uzexpocenter" exhibits products of the automotive industry of the Republic, which includes a number of enterprises, more than 30 joint ventures of JSC "Uzavtosanoat".

The Samarkand automobile plant presented 10 kinds of its products. Along with the already previously shown at previous exhibitions low-ash city bus LE60 and ambulance on chassis Isuzu NRL, the plant demonstrates new vehicles - light trucks. In turn, the manufacturer of cars GM-Uzbekistan has also presented its products, including

the new light commercial vehicle
Labo.

It should be emphasized that IIFCE within its framework saw about 80 centralized presentations of large industrial enterprises, small business and private entrepreneurship entities. The presentations of regions of the country gave detailed information about the development of local resources, development of industrial cooperation between small business and private

entrepreneurship and the basic enterprises of the industries.
